

DANA Enterprise

# Merchant Portal Onboarding

# Our Onboarding Process

# DANA Merchant Portal

*DANA's web portal for onboarding and managing your business*

## One Portal for Everything

Register, submit documents, and track your onboarding progress in one place.

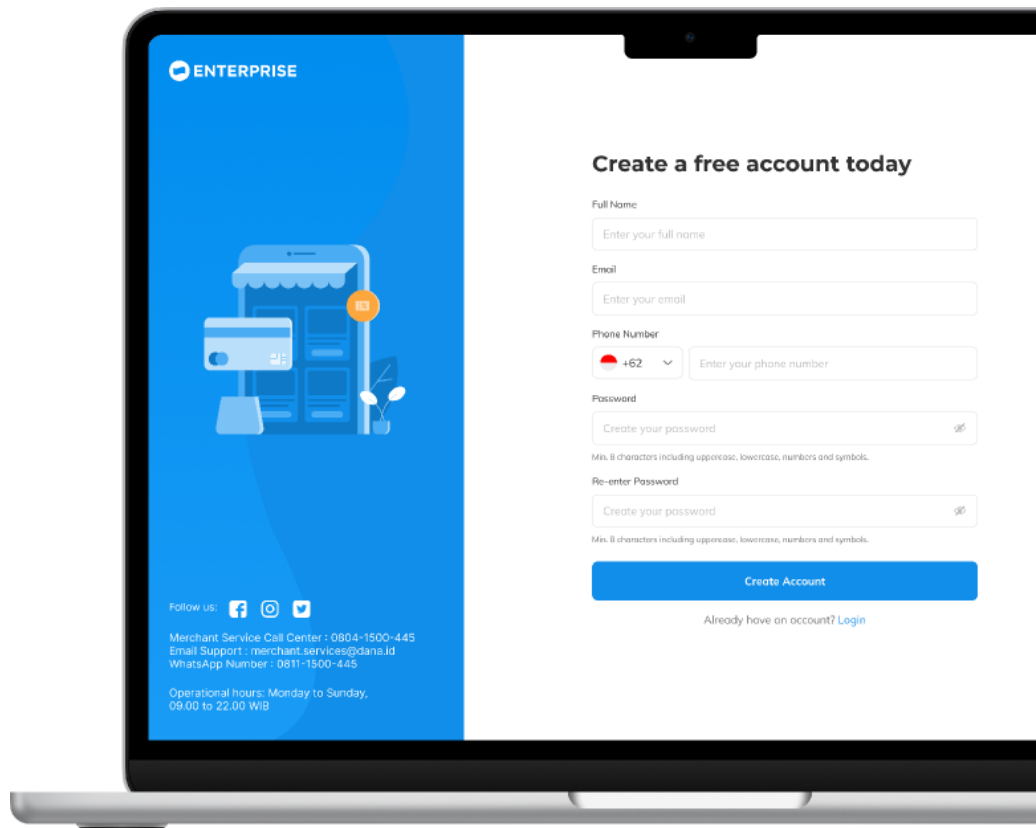

## Faster Onboarding

Automated verification and integration save you weeks of onboarding time.

## Manage your Business

Use our merchant portal to track payments & settlements after you go live.

[dashboard.dana.id](https://dashboard.dana.id) →

# Business Information Form

*The following business details will help us recommend the right solution and meet regulatory requirements:*

## 1. Company Profile

Company name, registration info, ownership, industry.

## 2. Business Type & Scale

Your business type & expected transaction volume.

## 3. Your Business Needs

Tell us your payment goals so we can recommend the best solution.

Your information ensures faster validation and the most suitable onboarding path.

A laptop screen displaying the 'DANA Enterprise' Business Information Form. The left side of the screen has a blue background with the 'ENTERPRISE' logo at the top. Below the logo, there are social media icons for Facebook, Instagram, and Twitter, followed by contact information: 'Merchant Service Call Center : 0804-1500-445', 'Email Support : merchant.services@dana.id', 'WhatsApp Number : 0811-1500-445', and 'Operational hours: Monday to Sunday, 09.00 to 22.00 WIB'. The right side of the screen is white and contains the form fields. The form starts with a 'Welcome to DANA Enterprise!' message and a sub-header 'Before we continue, let us know a little more about your business.' The form fields include: 'Company Name' (text input with 'PT Cashless Indonesia'), 'Country of Registration' (dropdown menu with 'Indonesia' selected), 'Business Type' (dropdown menu with 'Perseroan Terbatas' selected), 'Owner Nationality' (dropdown menu with 'Indonesian' selected), 'Business Industry' (dropdown menu with 'Manufaktur Tekstil' selected), 'Average Daily Transaction' (dropdown menu with 'Over Rp140.000.000' selected), and 'From where did you hear of DANA Enterprise' (radio button selection with 'Linkedin' selected). Below the radio buttons, there are three more options: 'Referral/Friend/Colleague', 'DANA Support Team', and 'DANA Website', each with a radio button.

# Legal Document Verification

*Fast and secure verification of your business documents.*

## 1. Gather Required Documents

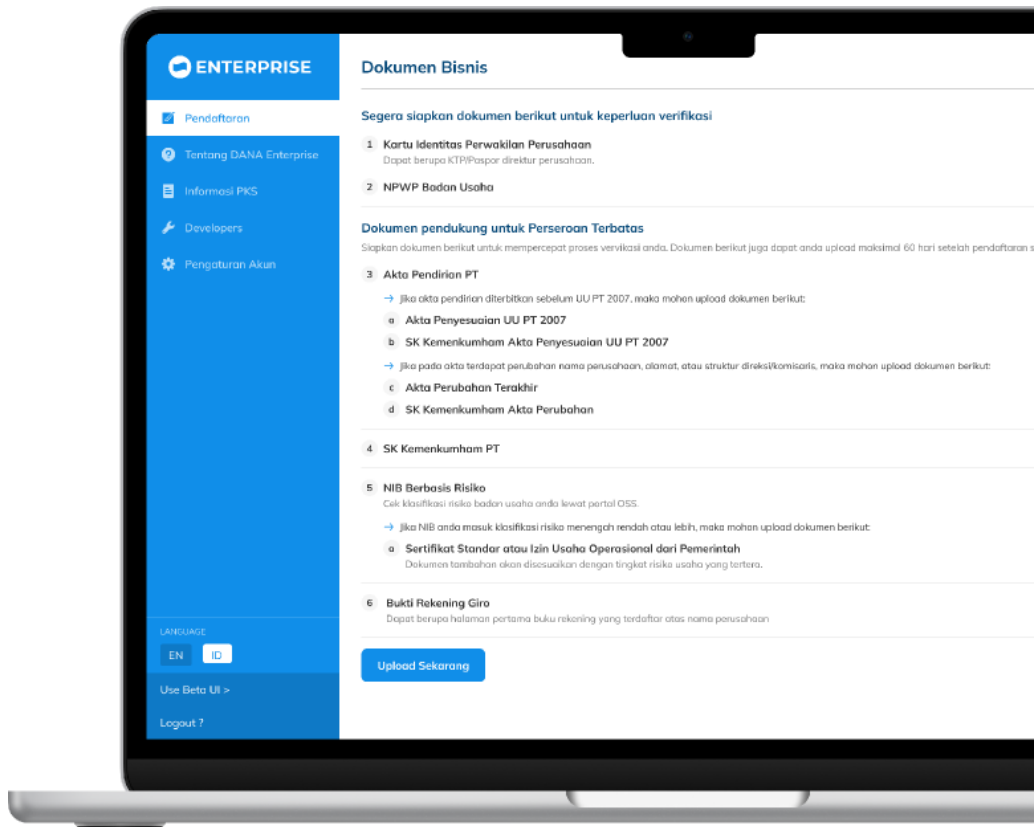

Our Merchant Portal will guide you through our required documents based on your business type (PT, CV, Koperasi, etc.)

## 2. Receive Instant Feedback

Our system checks your documents against government databases in real time to ensure accuracy and authenticity.

## 3. Lightning-Fast Validation

Validation can be completed in **as little as 10 minutes** if all documents are ready.

# Technical Integration Overview

*For features that require API Integration*

## Sandbox Integration

- Integrate using sandbox credentials and our API docs.
- Integration is tested against an automated **UAT testing**

## Production Setup

- After sandbox testing, you will receive your production credentials.
- Final verification with live endpoints in a controlled environment.

## Go Live

- Once production tests are approved, integration is activated.
- Merchants can now process **real transactions** with DANA.

API Documentation

Authentication API 

Payment Gateway API 

Overview

Create Order 

Consult Pay 

Query Payment 

Cancel Order 

Refund Order 

Payment Gateway API / Create Order

**Payment Gateway - Create Order**

 `/payment-gateway/v1.0/debit/payment-host`

This is the API used by Gapura Payment Gateway to create a hosted checkout URL.

Expected Timeout

SNAP service code

[Show API Details](#) 

 This API is used for the following solutions:

[Gapura Drop In Payment Gateway](#) 

[Gapura Payment Gateway Custom API](#) 

## 2. Read Our Documentation

Access API references, sample payloads, and integration guides.

 **Transfer to Bank Account Inquiry**  2/7 verified

[/v1.0/money/bank-account-inquiry.htm](#)

 Inquiry with valid data Verified 

**Test Scenario**

A successful bank inquiry with the following data

Bank account inquiry with valid data

amount: 50000 IDR

beneficiaryAccountNumber: 2460888509

beneficiaryBankCode: 014

**Expected Response**

 Verified resultCode is 2004200 and message is Successful

API call verified on 12/6/24, 4:06:54 pm WIB.

**In App Partner Action**

Mark Transfer to Bank Account Inquiry process as Success

## 3. Run our Testing Checklist

Go through our automated testing checklist for a compliant integration.

# Integration Resources

*Integrate faster with fewer issues using our integration resources*

## API Library

 [DANA Library Github](#) →

- Prebuilt libraries for popular languages to simplify integration.
- Currently available for **Gapura, Widget, and Disbursement**

*"Merchants using our API Library report integration time savings from **2 weeks to 3 days**"*

## UAT Testing Script

 [UAT Script Github](#) →

- Automated script for running required test scenarios.
- No need to run manual tests, get UAT approval in **under 15 minutes**.

## Discord for Developers

 [DANA Discord Server](#) →

- Real-time support from our developer support team
- Get answers quickly for any integration-related issues

# Get Approved for Production

Configure your production environment in our Merchant Portal before going live.

## 1. Generate Public Key

Create and submit a SNAP compliant [public key](#) for signing and secure communication.

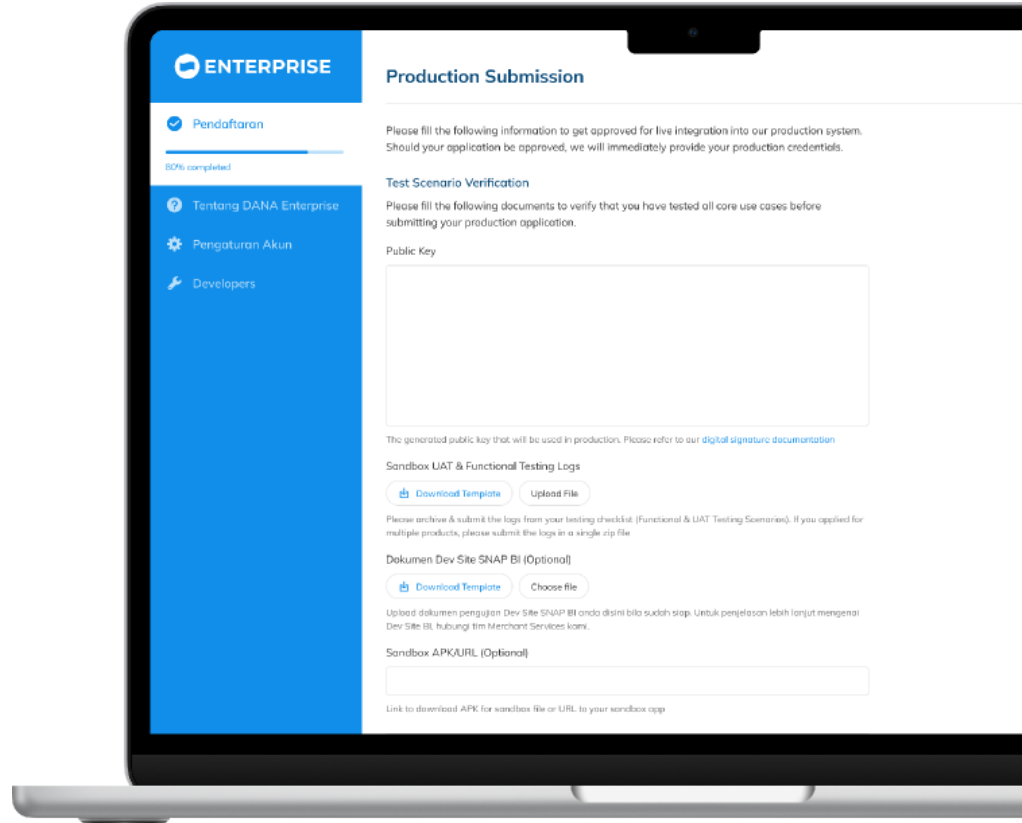

## 2. Submit Sandbox Logs

Upload your completed Sandbox UAT and functional testing logs & Uji Dev Site SNAP BI as proof of compliance.

## 3. Configure Production Webhooks

Register production webhook URLs to receive live transaction notifications.

Once these steps are approved, your production credentials will be issued and you'll be ready to go live.

## Before You Go Live

*Prepare your account while waiting for approval.*

### 1. Sign Agreement Docs (PKS)

- Perjanjian Kerja Sama (PKS) is required before going live.
- Our team will guide you through the signing process, which may run in parallel with onboarding.

### 2. Add User Accounts

- Invite team members to the Merchant Portal.
- We recommend assigning roles to team members before launch.

### 3. Create Submerchants

*Only for merchants that require submerchant services.*

- Register submerchants & stores in advance
- Configure settlement accounts for each submerchant.

# Support Channels

## Sales Team

Contact our sales team for partnership and sales inquiries. Available via email during business hours.
